

SAIF [LAST NAME]

AI Engineering Student & Software Developer

Cairo, Egypt | saif.mock@email.com | github.com/saif-portfolio

PROFESSIONAL SUMMARY

Driven Artificial Intelligence student and software developer with a strong foundation in Python, Java, and Swift. Experienced in building machine learning models, automating complex workflows, and creating autonomous productivity systems. Passionate about problem-solving through code and optimized algorithms.

CORE TECHNICAL SKILLS

- Programming Languages: Python, Java, Swift, AutoHotkey
- Machine Learning & AI: PyTorch, Neural Networks, Computer Vision
- Algorithms & Architecture: Parallel Processing, Backtracking, System Optimization
- Tools & Workflows: Notion Automations, Git, Scripting

EXPERIENCE & PROJECTS

Notion Systems Architect & Creator

Jan 2025 – Present

- Designed and published autonomous Notion templates, including advanced PARA organizational systems and student dashboards on the Notion marketplace.
- Implemented complex automated workflows to reduce manual entry and improve user efficiency.

Software Development Projects

2024 – 2026

- Computer Vision Mask Detector: Trained a MobileNetV2 model using PyTorch to detect face masks with 90%+ accuracy, implementing early stopping and custom data transformations.
- Algorithm Visualizer: Developed a Python-based visualizer for the Knight's Tour backtracking algorithm.
- Java Parallel Processing: Engineered a university project utilizing multithreading and parallel processing techniques to optimize computational tasks.

EDUCATION

B.Sc. in Artificial Intelligence (Expected Graduation: 2027) - University Name, Egypt
